

Legend

— Ashumet Valley Plume Boundary = Concentrations exceeding drinking water standards or Maximum Contaminant Level (MCL), dashed where inferred.
 Represents an exceedance of trichloroethene (TCE) and/or perchloroethene (PCE)
 (TCE MCL = 5 µg/L)
 (PCE MCL = 5 µg/L)

Note: µg/L = micrograms per liter and is a measure of concentration. It is approximately equivalent to parts per billion (ppb).

- Treatment Facility
- Extraction Well
- Extraction Well (Non-operational)
- Massachusetts Military Reservation Boundary
- Town Boundary
- Infiltration Trench
- Treatment System Piping
