

Falmouth

Legend

- FS-28 Plume Boundary = Concentrations exceeding drinking water standards or Massachusetts Maximum Contaminant Level (MMCL), dashed where inferred. Represents an exceedance of ethylene dibromide (1,2-dibromoethane or EDB) (EDB MMCL = 0.02 µg/L)
 - Bog/Wetland
 - Treatment System Piping (Dashed Where Proposed)
 - ◆ Extraction Well
 - ◆ Proposed Extraction Well
 - Outflow Bubbler
 - Public Drinking Water Supply Well
 - Treatment Facility
- Note: µg/L = micrograms per liter and is a measure of concentration. It is approximately equivalent to parts per billion (ppb).
