

Legend

- FS-29 Plume Boundary = Concentrations exceeding drinking water standards or Maximum Contaminant Level (MCL). Represents an exceedance of ethylene dibromide (EDB) and carbon tetrachloride (CCl₄) (EDB MMCL = 0.02 µg/L) (CCl₄ MCL = 5 µg/L)
- Other Plume Boundary
- Massachusetts Military Reservation Boundary
- Town Boundary
- Treatment System Piping
- Infiltration Gallery/Trench
- Treatment Facility
- ◆ Extraction Well
- ⊕ Reinjection Well

Note: µg/L = micrograms per liter and is a measure of concentration. It is approximately equivalent to parts per billion (ppb).
